

Seminar in Asian Paints

Yaskawa India and Orior Engineering Services – Authorized Business Partner of Yaskawa India jointly organized a seminar in Asian Paints, Greater Noida for YASKAWA's new product awareness.

During the seminar, Yaskawa India presented our matrix converter drive-U1000 and explained benefits of these drives in cement industry focusing to energy saving and less harmonics. We also presented our case story for U1000 installed successfully across India which helped participants in understanding the real time benefits in their application. Seminar explored the practical and theoretical aspects of drive technology.

Mr. Yogender Tanwar, Astt. Manager- Sales started the program by introduction & corporate presentation on Yaskawa's journey and vision. Sameer Bakshi took the participants through the range of products Yaskawa can offer to the customers & focusing on U1000 and its benefits followed with Q&A and technical training for the engineers with hands on A1000 drive and explaining the basics of VFD.

The seminar received overwhelming response from the participants and Yaskawa India takes this opportunity to thank Orior Engineering Services for the cooperation and efforts in making this event a success.
